

I am writing you to comment on the NAB's petition 04-160 and am asking you to kindly reject it. I do not mind paying for XM radio and I find the traffic and weather channels truly helpful.

I cannot help but feel that the radio industry feels threatened and the radio industry in general appears to be owned by only a handful of companies, i.e. clearchannel, and that they want total control of what I can hear. I feel that this is maybe only the first step in stripping me of what I want to hear and sat. radio in general.

Competition and variety are good for me, the consumer. If they want to compete with sat radio, they can. But they seem to not want to through petitions like 04-160.

Thank you
